Re: RFNWR Site
Work Order: 634200

Dear David Lucas:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on August 22, 2023. This original data report has been prepared and reviewed in accordance with GEL's standard operating procedures.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Chain of custody did not include collect times for samples received, client was notified and advised the correct sample collection times..

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at [REDACTED]

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

CCV Requirements

Calibration verification standards (ICV or CCV) requirements have not been met for samples in this batch in this SDG. One or more target analytes failed acceptance criteria with a positive bias in the standards bracketing the samples in this SDG. These target analytes were not detected in the associated environmental samples; therefore, the non-compliance had no adverse effect on the data.

Quality Control (QC) Information

Laboratory Control Sample (LCS) Recovery

The laboratory control standards analyzed with this SDG did not meet the established acceptance criteria. There were recovery failures of target analytes that are attributed to the tissue source used for the extraction and analysis. Tissue matrices can exhibit matrix interferences that can cause failures. The data is being flagged accordingly.

Sample	Analyte	Value
1205514628 (LCS)	11-Chloroeicosafluoro-3-oxaundecane-1-sulfonic acid (11-Cl-PF3OUdS)	194* (40%-150%)

	Perfluorobutane sulfonic acid (PFBS)	31* (40%-150%)

Matrix Spike (MS) Recovery Statement

The MS or MSD (See Below) recovered spiked analytes outside of the established acceptance limits. As similar recoveries were displayed in the MS and MSD, the failures were attributed to sample matrix interference and the data were reported.

Sample	Analyte	Value
1205514632 (EL23-2833-MEAT #1MS)	Perfluorododecane sulfonic acid (PFDoS)	34* (40%-150%)
	Perfluorotridecanoic acid (PFTrDA)	195* (40%-150%)

	Perfluorododecane sulfonic acid (PFDoS)	36* (40%-150%)
	Perfluorotridecanoic acid (PFTrDA)	201* (40%-150%)

Internal Standard (ISTD) Acceptance

The internal standards analyzed with this SDG did not meet the established acceptance criteria. There were recovery failures that are attributed to the tissue source used for the extraction and analysis. Tissue matrices can exhibit matrix interferences that can cause failures. The data is being flagged accordingly.
